PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4 years of experience designing, building, and optimizing scalable software solutions across enterprise and government projects using React and Angular. Strong command of React hooks, state management, client-side routing, JavaScript (ES6+), HTML5, CSS3, and Bootstrap, with proven experience integrating REST APIs and ensuring smooth, fault-tolerant data flow between frontend and backend systems. Delivered scalable, cross-browser-compatible interfaces for enterprise CRM platforms and UAE government projects serving 500+ users. Collaborative team player with a proactive, ownership-driven mindset, comfortable working with cross-functional teams including backend developers, designers, and product managers in remote Agile environments.

TECHNICAL SKILLS

MEAN Stack: MongoDB, Express.js, Angular (v12-v17), Node.js

Frontend: React (Hooks, State Management, React Router), Angular (v12-v17), TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, RxJS, NgRx, D3.js, SWR, Responsive Design, Cross-Browser Compatibility, Reusable Component Architecture, Micro Frontend

Backend: Node.js, Express.js, RESTful APIs, GraphQL, WebSockets (Socket.IO), OAuth2, JWT, Nodemailer, Python

Databases: MongoDB, MySQL, Database Design

DevOps & Tools: Git, CI/CD Pipelines, Docker (familiar), SonarQube, Agile/Scrum, Code Review, Linux, Webpack

Cloud & Services: AWS S3, GCP (OAuth2), Azure (OAuth2)

Testing & Quality: Unit Testing, Jest, 75%+ Test Coverage, SonarQube Static Analysis

PROFESSIONAL EXPERIENCE

Software Engineer

Nov 2024 – Feb 2026

Beinex Solutions (Remote)

Kochi, India

- Developed and maintained responsive, high-performance web applications using React and Angular, implementing modern frontend architecture with hooks, component-based design patterns, and client-side routing — delivering reusable UI component libraries, D3.js data visualization dashboards, and dynamic form systems across enterprise deployments.
- Optimized application performance and ensured scalability across different devices and browsers through lazy loading, change detection strategies, and NgRx state management, achieving a 45% improvement in load speed; enforced code quality through SonarQube static analysis and Git-based CI/CD workflows.
- Collaborated with cross-functional teams including backend developers, designers, and product managers within Agile/Scrum sprint cycles, contributing to Micro Frontend architecture that reduced inter-team dependencies by 30% and accelerated feature delivery by 35%.

Full Stack Developer

Nov 2021 – Jun 2024

Tandemloop Technologies

Bangalore, India

- Built and maintained responsive, scalable React and Angular web applications, integrating with REST APIs to ensure smooth data flow between frontend and backend systems — handling API errors effectively and building resilient, fault-tolerant integrations across 10+ multi-tenant client environments.
- Implemented modern frontend state management using NgRx and RxJS across 5 integrated modules of Zone Suite CRM, managing complex API integration patterns, routing, and asynchronous data flows supporting 500+ concurrent users across high-traffic, large-scale multi-tenant environments.
- Collaborated closely with backend developers, designers, and product managers to scope and deliver customer-facing features in Scrum-based sprints; maintained code quality through Git version control workflows, structured code reviews, and best development practices — reducing client onboarding time by 30% and manual operations by 60%.
- Integrated OAuth2 authentication (Gmail/Office 365), Razorpay payment gateway with webhook handling, and third-party REST APIs with robust error handling and real-time data synchronization, reducing notification latency by 50% for 500+ users.

KEY PROJECTS

ZONE Suite CRM Platform | MongoDB, Express.js, Angular, Node.js, OAuth2

2022 – 2024

- Developed an enterprise CRM with 5 integrated modules (contacts, orders, invoices, email management, meeting notes) featuring OAuth2 Gmail/Office 365 integration, Razorpay webhook-driven payments, and a cron-based reminder engine, serving 10+ multi-tenant client environments.
- Built REST API integrations with bulk export/import pipelines, AWS S3 document storage, and Nodemailer email templates, cutting manual operations by 60% and reducing onboarding time by 30%.

DOH Performance-Optimized Application | React, SWR, Tailwind CSS, REST APIs

2024

- Built a high-performance responsive React UI for a UAE government project using SWR for optimized async data fetching, achieving a 30% improvement in load times with reusable, cross-browser-compatible components built in Tailwind CSS.
- Developed a scalable reusable component library with mobile-first responsive layouts, ensuring accessibility and consistent design across all screen sizes and devices.

EDUCATION

Visvesvaraya Technological University

Karnataka, India

Bachelor of Technology in Computer Science and Engineering – CGPA: 8.1/10.0

Graduated 2021

Relevant Coursework: Data Structures, Algorithms, Operating Systems, Database Management, Machine Learning

Deakin University

Masters of Data Science | Expected 2028 | Distance Learning

In Progress

ACHIEVEMENTS & CERTIFICATIONS

Certification: Microsoft Technology Associate – Introduction to Programming using JavaScript
